

FEC Solutions, Sikes, to Present at Conference

Des Moines, IA, August 29, 2011 — Nicholas Sikes, Operations Manager of FEC Solutions, will be presenting September 14-16, at the International Biorefining Conference & Tradeshow in Houston, Texas.

Sikes brings a business and engineering mindset into the development and commercialization of biorefining processes. As Operations Manager at FEC Solutions, Sikes assists ethanol plants to improve their technical processes and brings technologies together in unique ways to significantly improve operating efficiencies. His areas of expertise include optimization of corn oil separation and connecting ethanol plants with technology partners to implement commercial scale processes at their existing sites.

Nicholas Sikes

Prior to joining the FEC Solutions team, Sikes worked in other bio-energy arenas including gasification and thermo-chemical processes for renewable diesel, and earned a MBA from Iowa State University.

“Nicholas’ wealth of renewable fuels and technical process experience makes him a huge attraction for the conference,” said Joseph Riley, General Manager of FEC Solutions.
